**What's new in Real Warfare 1242:**

is a Japanese manga series written and illustrated by Shotaro Ishinomori. The series revolves around robot combat between countries and the tension between independence and the potential of a global power. It was the first postwar manga to be adapted into a live action feature film in 1967, the first Mecha Anime in Japan and the world's first live action feature film to include mechanical special effects. Plot In the near future, the world has been divided into two nations - a utopian country called Harmonica and a war-torn country called Union. Harmonica had peacefully unified the world following a religious war. However, a separate fundamentalist religious cult, called the Seven Knights, staged a raid on Harmonica in 2350 and began plaguing the nation with their armies of nearly 100 robots, which they call "Scholar Knights". The Scholars are also noted for having a high degree of intelligence, which means they can almost always defeat their human opponents. The Scholars create Gnormo Warrior robots. It is difficult to tell if a robot is acting by itself or is controlled by a human operator until the Scholars have disabled the robot and found the operator. Harmonica's ensuing battle with the Scholars reveals many weaknesses and flaws within the nation's robot defenses. One of the most disturbing weaknesses is that virtually all of the nation's robots can be destroyed by the weakest ones. Thus, most martial arts training takes place not against human opponents, but using found objects. Several of the nation's robots were found so decrepit that their destruction ended their mission. The last remaining forces are led by one of the nation's greatest warriors, by the name of a "Weaver", whose spiritual power resembles that of the Seven Knights but who may also be a member of the Seven Knights. Together, they combat against the Scholar Knights once again and try to find the identity of the Weaver in hopes of reforming the robots. The series starts as the Scholarn are on the verge of destroying both nations. However, at the last moment, a neutral nation called Auric Force springs into action and comes to the rescue of the citizens of Harmonica and Union. The Scholarn and Harmonicans begin to learn to work together, despite the Wheel's rapid collapse of the once united countries into competing sets of ideologies. Meanwhile, the Weaver begins to seek out the "Great Trimeans" among his attackers, with the hope of restoring himself
